

PRADHAN MANTRI NATIONAL DIALYSIS & EYE HEALTH INITIATIVE

AI-Assisted Rural Diabetic Retinopathy Screening Network | SIH26038

TELEMEDICINE REPORT

Date: Today

Screening ID: SCR-0842-2026

1. PATIENT DEMOGRAPHICS & CLINICAL VITALS

Patient ID: PHC-2026-0842	Name: Rameshwar Patel	Age / Sex: 58 yrs / Male
PHC Location: Rampur PHC	Diabetes Duration: 11.0 years	HbA1c / BP: 9.2% 142 mmHg
Examined Eye: OD (Right Eye)	Image Quality: 74.2/100 (Acceptable)	Operator: Community Health Officer (CHO)

2. AI SCREENING ANALYSIS & QUANTITATIVE BIOMARKERS

Predicted DR Severity:	Severe NPDR (Confidence: 73.5%)	Uncertainty: 0.07
Hemorrhage Area:	0.50% of retinal field	Lesion Count: 42 detected
Exudate Area:	0.21% of retinal field	Macula / DME Risk: High (CSME: Exudates < 1.0 DD from fovea)
Multi-Agent Verdict:	ACCEPT (ICDR/ETDRS Guardrail Verified)	Vision + Clinical Agent: Congruent

3. CLINICAL TRIAGE & TELE-OPHTHALMOLOGY ROUTING

TRIAGE TIER: URGENT REFERRAL

Dual Co-Diagnosis: Severe NPDR + CSME (High Risk Central Vision Loss)

Clinical Action: URGENT: Patient exhibits sight-threatening diabetic retinopathy (Severe NPDR (high 1-year progression rate to proliferative stage), Clinically Significant Macular Edema (CSME: exudates encroaching foveal avascular zone)). Immediate evaluation for anti-VEGF injection, panretinal photocoagulation (PRP), or surgical intervention.

TIME-TO-REFERRAL: URGENT (< 48 HOURS)

Designated Referral Hospital:
District Civil Hospital (Tele-Ophthalmology Hub)

Tele-Ophthal Emergency Helpline: 104 / 108

Vision Centre Reg: NPCBVI-RUR-2026

4. MULTILINGUAL PATIENT GUIDANCE / [Progress Bar]

English: Diabetic retinopathy is a preventable cause of blindness. Keep your blood sugar (HbA1c < 7%) and blood pressure tightly controlled. Follow the prescribed referral schedule without delay. If you experience sudden blurriness or dark floaters, report immediately to the nearest eye hospital.
